DETAILED ACTION

Allowable Subject Matter

1. Claims 1-9 are allowed.
2. The following is an examiner's statement of reasons for allowance: the record of prior art does not show an electric generator adapted for use with a vehicle wheel, comprising a housing adapted to be mounted on the vehicle wheel and having a base wall and a surrounding wall that extends from a periphery of said base wall and that cooperates with said base wall to confine a receiving space, said surrounding wall being formed with inlet and outlet vent holes that are in spatial communication with said receiving space; an air impeller disposed in said receiving space and being formed with a plurality of radial impeller blades such that flow of air into said receiving space through said inlet vent hole and out of said receiving space through said outlet vent hole when the vehicle wheel rotates results in rotation of said air impeller receiving space; and a magnet ring disposed in said receiving space and coupled co-rotatably to said air impeller such that rotation of said magnet ring with said impeller results in an induced electrical current in a stator coil as claimed in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
